

FuturFindr

Developers: Frank Sosa, Seth Parsons, Saiprathik Chalamkuri, Ritesh Thakur, Josiah Valdez

Introductions

Frontend

Frank
Sai

Backend/ Database

Seth
Ritesh

Nontechnical/ Testing

Ritesh
Josiah

DEMONSTRATION

Production:

www.futurfindr.me

API:

api.futurfindr.me

Development:

dev.futurfindr.me

Self-Critique

What did we do well?

- We were able to quickly pick up tools that we didn't have experience with before
- Pair programming in smaller groups

What did we learn?

- How powerful React can be as a web development tool
- We also got a taste of the software development cycle and deployment

What did we teach each other?

- Effective communication
 - updating teammates on our progress
 - writing meaningful commit/issue messages

Self-Critique (2)

What can we do better?

- We stuck to focusing on our roles, rather than branching out and learning about all the pieces of development
- Finding restful APIs that were richer in content or scraping multiple per model
- Expand on connections to see more options and possibly filter them

What effect did the peer reviews have?

- kept us accountable the whole semester
- Made us work on our shortcomings

What puzzles us?

- How we would have started this project without the older projects being open

SportsRightNow Critique

What did they do well?

- Models strongly connected
- Links to purchase tickets and integrated map of stadium/venues
- Filtering, searching, sorting works pretty well

How effective was their RESTful API?

- Though Postman documentation wasn't updated for filtering, API was intuitive
- Similar to how we implemented ours

How well did they implement your user stories?

- Hit all the main points we requested for the most part
- Provided valid explanation for what they couldn't

SportsRightNow Critique (2)

What did we learn from their website?

- ASU pumps out the most pro athletes despite size
- In NFL, size and win rate seems to be inversely proportional
- Portland not hosting any events of any league, matter fact–Oregon not hosting any events
- Lebron is the GOAT

What can they do better?

- Occasionally some of the filtering options weren't loading correctly (stuck on loading page)
- Postman Documentation can be updated with more information
- Highlighting on search terms, only highlights on global searches

What puzzles us about their website?

- Sometimes image size/proportion distorts and makes card unreadable unless you click more info button

Thank You!

And may you find your futur...
