

# FuturFindr Presentation

*Developers: Frank Sosa, Seth Parsons, Saiprathik  
Chalamkuri, Ritesh Thakur, Josiah Valdez*

# Introductions

Frontend: Frank and Sai

Backend: Seth and Ritesh

Database: Seth

Non-Technical (including testing): Ritesh and Josiah

# DEMONSTRATION

Production:

[www.futurfindr.me](http://www.futurfindr.me)

API:

[api.futurfindr.me](http://api.futurfindr.me)

Development:

[dev.futurfindr.me](http://dev.futurfindr.me)

# Self-Critique

## ***What did we do well?***

- We were able to quickly learn things like using React and python and flask for the backend.

## ***What did we learn?***

- How powerful React can be as a web development tool
- We also got a taste of the software development cycle and all that entails it

## ***What did we teach each other?***

- Effective communication and updating teammates on our progress, as well as writing meaningful commit/issue messages, as well as time management

# Self-Critique (cont.)

## ***What can we do better?***

- We stuck to focusing on our roles, rather than everyone trying to branch out and implement features we were not familiar with

## ***What effect did the peer reviews have?***

- We got our questions answered by the TA in a helpful manner and he was always open to helping us at anytime

## ***What puzzles us?***

- How we would have started this project without the older projects being open
- AWS hosting, unit testing setup

# SportsRightNow Critique

## *What did they do well?*

- They were able to effectively connect the Model pages together
- Filtering works really well

## *How effective was their RESTful API?*

- While the Postman docs weren't updated for filtering, the API interface was pretty intuitive and similar to how we implemented it

## *How well did they implement your user stories?*

- They seemed to hit all of the main points that we told them

# SportsRightNow Critique (cont.)

## *What did we learn from their website?*

- LeBron is the GOAT

## *What can they do better?*

- Some of the filtering options weren't loading correctly (stuck on loading page)
- Postman Documentation can be updated with more information
- Highlighting on search terms

## *What puzzles us about their website?*

- Why we have to click on a card to see win-losses for a team

# Thank You!
